

The Creator

I'M GOING TO GIVE YOU this \$295 software package for 10 bucks. If you don't want to spend \$10, you'll find the source code in this magazine. It's yours to type in and use. I'm doing this because I want to make a statement. If this program is worth \$10, then what should some others be selling for? Most commercial software is vastly overpriced. I want to make a splash, set a standard.

USING MODEL I/III DISK LOAD80

Check the accompanying articles in 80 MICRO for instructions on using each program. All systems compatible with the program are listed in the Keybox. The RELOAD 80 column also contains information on using LOAD 80. For back issues of 80 MICRO or LOAD 80, call (800)-258-5473.

LOAD 80 disks are double-sided to allow room for more programs. To access the other side, simply flip the disk. Both sides contain TDOS, the DOSPLUS kernel. Model I users should sim-

ply insert the LOAD 80 disk in Drive 0 and hit reset. Use the Basic supplied on TDOS to load and run Basic programs.

Model III users must use the TRSDOS CONVERT utility:

- Make a BACKUP of your TRSDOS disk. Place the BACKUP in Drive 0 and the LOAD 80 disk in Drive 1.
- Type PURGE and then the Master Password for your TRSDOS disk. Kill all the files.
- Type CONVERT and answer Source as 1 and Destination as 0. The LOAD 80 programs will be copied onto your TRSDOS disk.
- Flip the disk and do the last step over.

Files which are marked ASSEMBLY require Editor/Assembler which will load early Apparat source code. Consult the producers of the various Editor/Assemblers for specifics on their product.

For technical help with LOAD 80, please call or write to Art Huston, Load 80, 80 Pine St., Peterborough, NH 03458. If you want to return or exchange your disk, please write to Lori Eaton, 80 pine St., Peterborough, NH 03458.

DISCLAIMER

Please note that there is no warranty expressed or implied that these programs will do anything other than save you typing. Load 80 is simply the listings from 80 Micro; it will not run under all system configurations. Use the Key Boxes accompanying each article in 80 Micro as your guide. LOAD 80 is published monthly by 1001001 Inc., a subsidiary of Wayne Green Inc. The entire contents are copyrighted 1982 by Wayne Green Inc. No parts may be copied for other than your own personal use.

LOAD 80 is manufactured by Instant Software Inc., a subsidiary of Wayne Green Inc.
